Alexandria, VA 22313-1450

Dear Sir:

Pursuant to 37 C.F.R. § 1.56, submitted herewith are copies of five Official Communications issued in the corresponding Japanese, German, Korean, Taiwanese, and UK Patent Applications. For the Examiner's convenience, we have enclosed an English translation of the Official Communications from the corresponding Japanese, German, Korean, Taiwanese Patent Applications and a completed Form PTO-1449.

Applicant has had these translations prepared by a professional translation service, and Applicants presently have no reason to doubt that the translation is accurate. However, Applicants have not independently verified the accuracy of such translation, and accordingly, submission of the same should not be taken as a binding admission by Applicants that the translation is accurate.

Applicant cites U.S. 5,302,788 because it is cited in the German Official Communication. However, Applicant believes that the correct U.S. patent number should be 5,302,877 which has been cited in a previously filed Information Disclosure Statement with the U.S. Patent Office on April 19, 2004.

The statement is not a representation that all of the information cited is necessarily effective as prior art against the application.

Applicant respectfully request that the enclosed references be made of record in the subject application.

Respectfully submitted,

Date: June 1, 2006
